

22 Series

Quad II Power Amplifier (production from 1953-1969)

Features

- Very high quality valve monoblock power amplifier (2 required for stereo).
- Originally designed for use with the QC2 mono control unit. For stereo operation, two required in conjunction with the Quad 22 stereo control unit/pre-amplifier.
- Adequate output power for normal installations with high sensitivity loudspeakers.

Specification

Controls:	None
Input:	1.4V from control unit/pre-amplifier
Output:	15w into 15 ohms or 7 ohms
Dimensions:	318mm wide; 162mm high; 119mm deep
Weight:	9.3Kg
Finish:	Grey
Audio sockets:	6-pin Bulgin (also provides power connections for control unit)
Speaker sockets:	4mm banana (short reach)

Main Accessories/Spares

Description	Spares Ref.	
Loudspeaker plug 4mm (red)	PP378A2	short reach
Loudspeaker plug 4mm (black)	PP378A0	short reach
AC power supply plug 2-pole Bulgin	PS02P29	
Plug 6-pin Jones	P06JPCT	
Bulb 6.5V 0.15A MES round	BB6V5MB	
EF86 valve	DEF86XX	
KT66 valve	DKT66XX	
GZ34 valve	DGZ34XX	replaces GZ32 originally fitted.
Capacitor mod kit	Q02469A
