

77 System Console

Features

- The size of a small paper back.
- Logical to use.
- Step by step menu driven commands.
- Two way infrared communications.
- Allows control of any Quad 77 system however complex and receives continuous reports of the system status.
- Powered by rechargeable batteries. Runs for up to 8 weeks between charges.

NOTE: We strongly advise that the system console is kept on its cradle charger whilst not in use to optimise performance.
