

Electrostatic Loudspeakers

ESL-57

Features

- The world's first commercial full range electrostatic loudspeaker. Originally called the Quad ELS but now usually referred to as the ESL-57.
- It was first manufactured in 1957.
- Capable of very high quality reproduction at normal domestic listening levels and still very highly regarded – the only better loudspeaker being the Quad ESL-63!

Specifications

Maximum Output:	93dB on axis in free space in frequency range 50 Hz-10kHz (referred to 0.0002 dynes/cm ²)
Impedance:	30-15 ohms in range 40Hz-8kHz (falling above 8kHz)
Sensitivity:	86dB
Mains voltage:	100-120V or 200-250V, 50-60Hz
Power Consumption:	8W approx.
Dimensions:	880mm wide; 790mm high; 270mm deep
Weight:	18Kg each
Front grille finish:	Expanded aluminium, bronze or black
Audio Sockets:	4mm banana plugs (short reach)
